

SPECIFICATION AMENDMENTS:

Please replace the paragraph beginning on page 3, line 9, with the following amended paragraph:

-- Fig. 5 is a sectioned side view of a mode of embodiment to which an operator's seat 40 is added of the cab 20 disclosed in the above patent publication, and Fig. 6 a plan view of the same embodiment. Referring to Figs. 5 and 6, the cab 20 is fixed in the position on the turntable 3 which is offset from the center C of a swinging movement thereof 3, and an outer edge 8 (a broken line shows a turning circle of the slide door 30 being opened) of a turning circle of the slide door 30 being opened and closed stays within a turning radius R of the outer edge of the turntable 3. The cab 20 is provided with a total of five support posts 34a, 34b, 34c, 34d, 34e in the four left and right corners thereof and at an intermediate section of the portion thereof which is on the side of the slide door 30. In the interior of the cab 20, an operator's seat 40 having a back 41 against which the back of an operator can be reclined is provided. --
